SLIMLINE LITTER & RECYCLING BIN

FEATURES

- The Slimline Litter & Recycling Unit offers a sleek and streamlined solution for managing up to four different waste streams in one unit. Featuring lift-up flaps for each aperture, this large recycling bin keeps contents hidden and effectively contains any odours.
- To ensure practicality and floor protection during relocation or cleaning, rubber feet are fitted to the base of the bin, preventing any marking of floors.
- Manufactured using the highest quality 2mm hot dipped galvanised steel, expertly primed and powder coated in your choice of RAL colour.

SPECIFICATIONS

- Sleek and streamlined design.
- Capacity for up to four different waste streams.
- Lift-up flaps for discreet waste disposal.
- Rubber feet for floor protection during relocation or cleaning.
- 60L capacity per internal liner.
- Fitted with an easy to use stainless steel slam lock, simply use the T shaped key provided, to release the lock and open the doors.
